

Even before meeting Prof Shaheer in person his reputation as a very respected teacher and a brilliant designer preceded him. Ashiana Housing Ltd did have the good opportunity of utilizing his brilliance when he was associated for our various projects. One of the Company's retained Architect had in fact been his student and what he told us about him was so very true when we got to working with him.

Meticulous to the core, Prof Shaheer went to great depths to understand the client's brief and when he did come up with the concepts, one could understand his vast repertoire since each project has its own unique requirements. His drawings were excellent, to say the least, and meticulously detailed with nothing left to chance.

His consideration of cost and ease and speed of execution which are so important for commercial, time bound projects was remarkable considering the varied types of projects which he designed during his lifetime. We saw how he carefully and easily he blended the need for concealing service areas like Sewage treatment plants, Generators and Electric Substations into the main landscape

With his untimely passing away, Ashiana Housing Ltd whose Landscape designer he was has lost not only a very capable designer but a friend and guide which will be difficult to replace.

***Mr. Vishal Gupta***

Ashiana
